Associate firms (if any) :

Description of Project and Services Provided:

The project comprised of a bridge/road link between West Port at Pulau Lumut in Port Klang to North Port located in the north of Port Klang.

The project's total length was 3.8km, commencing at the southern end of an existing bridge over a railway (at the end of North Klang Straits Bypass) and traversing along the Persiaran Sultan Hishamuddin, crossing the Lumut Straits water way, ending at Jalan Pelabuhan Barat in Pulau Indah, Port Klang. The main span bridge span was 630m with 1.3km of approach viaducts.

Services:

- Environmental screening study
- Route/alignment selection study
- Bridge option study
- Preliminary superstructure and substructure (bridge) design
- Preliminary highway and drainage design
- Costings
- Preliminary land acquisition plans
