Start Date : June 2004		
Completion Date : June 2006		
Associate firms (if any) : N/A		

Description of Project and Services Provided:

The 1200 Villa public housing project is part of a large scale housing development envisioned by the Late H.H Sheikh Zayed Bin Sultan Al Nahyan. CEPM's challenge lied in fitting in the living requirements of the community (as used to in the area), and making it viable with the financial building model. At about 6000 Sq.ft. per villa and with a parking garage and a large boundary wall, this model is now also a part of the short listed home styles provided by the H.H Private Department, as an instant favorite hundreds more are being built in different areas of Abu-Dhabi.

Services:

- Master Planning
- Architectural Design
- Visualization
- Structural Design
- Services Design
- Finishes and Specifications.
- Construction Management.
